

V6 new upgrades

The latest Homologa V6 version is now online. Several changes have been implemented including interface, internal structure and data extraction. These are some of the most relevant changes that have been implemented:

Contents

1- Search modules names changed:	2
2- Search Modules description:	3
Plant Protection Products search modules.....	3
MRLs search modules	3
3- Module improvements:	5
All modules:	5
Full "New/Modified" Product Information module (former "New/modified uses" v5 module):	5
Basic "New/Modified" Product Information module:	5
MRLs & Active Ingredients Country Comparison module:	5
MRLs Full Information module (new filters, tooltips and new columns):	5
Full Product Information module columns added:.....	5
Basic Product Information with Crops module:.....	6

1- Search modules names changed:

All search modules names have been modified. The table below show the former names (V5) and the new name (V6):

Former module name (V5)	New names (V6)
Plant Protection Products search modules	
Brand Registrations (module)	Basic Product Information
Brand registration with crops	Basic Product Information with Crops
Use details	Full Product Information
Active level registration	Basic Active Ingredient Information with Crops
New/Modified Brands	Basic "New/Modified" Product Information
New/Modified Uses	New Crops
-	Full "New/Modified" Product Information (new module not available in V5)
MRLs search modules	
MRLs Details	MRLs Full Details
MRLs Country Comparison	MRLs & Active Ingredients Country Comparison
Registration MRLs Comparison	Registration MRLs Comparison
New/Modified MRLs	Full "New/Modified" MRLs Information
MRLs comment	MRLs Legal Framework
ADI ARfDs	ADI & ARfDs
Data availability	
Registrations data availability	Plant Protection Information Availability (map)
MRLS data availability	MRLs Information Availability (map)

2- Search Modules description:

Plant Protection Products search modules

- a. Basic Product Information:
This module provides basic information about Plant Protection Products (registered & expired) such as brand name, registration number, active ingredients, formulation, product type, registrant, etc.
- b. Basic Product Information with Crops:
This module provides information about Plant Protection Products (registered & expired) such as brand name, registration number, active ingredients, formulation, product type, registrant, etc. together with registered crops.
- c. Full Product Information:
This module provides full details about both registered and expired Plant Protection Products (brand name, registration number, active ingredients, formulation, product type, registrant, etc.) together with full GAP details (crop, pest, stage of application, method of application, dose rate, maximum number of treatments, PHI, etc.).
- d. Basic Active Ingredient Information with Crops:
This module provides full information about the relationship between crops and active ingredient per market/country (registered vs expired). Active Ingredients defined by International and private standards are also available.
- e. Basic "New/Modified" Product Information:
This module provides information about Plant Protection Products data evolution of through time at a basic level: brand name, registration number, active ingredients, formulation, product type, registrant, etc.
- f. New Crops:
This module provides information about new Plant Protection Products approvals and their registered crops.
- g. Full "New/Modified" Product Information:
This module provides information about Plant Protection Products data evolution through time, including use details changes.

MRLs search modules

- h. MRLs Full Details:
This module provides detailed Maximum Residue Levels (MRLs) data per country/market.
- i. MRLs & Active Ingredients Country Comparison:
This module allows for direct Maximum Residue Levels (MRLs) comparisons between countries/markets.

- j. Registration MRLs Comparison:
This module compiles Plant Protection Products data including use information (trade name, registration number, active ingredients, registrant, crops, PHI etc.) while providing detailed Maximum Residue Levels (MRLs) data per country/market.
- k. Full "New/Modified" MRLs Information:
This module provides information about Maximum Residue Levels (MRLs) data evolution through time per country/market.
- l. MRLs Legal Framework:
This module provides information about Maximum Residue Levels (MRLs) legal framework (sources used, law references, applicable default MRLs) per country/market.
- m. ADI & ARfDs:
This module provides ADI (Acceptable Daily Intakes) and ARfD (Acute Reference Dose) values for Active Ingredients.

3- Module improvements:

All modules:

- a. New site composition filters added (Site, Place, Crop purpose, Crop status, Crop variety, Crop trait).
- b. New site composition columns added in the results.
- c. Tooltip added describing 'crop info' column.

Full "New/Modified" Product Information module (former "New/modified uses" v5 module):

- a. Form validation rules changed: more permissive i.e. broader search allowed in just 1 country on a specific time range (less than 6 months).

Basic "New/Modified" Product Information module:

- a. Form validation rules changed: more permissive i.e. broader search allowed on just 1 country on a specific time range.

MRLs & Active Ingredients Country Comparison module:

- a. Tooltip added explaining the 'Status base country' column.

MRLs Full Information module (new filters, tooltips and new columns):

- a. Crop info original names (site orig name) columns added.
- b. Active type.
- c. EPPO code.
- d. Future MRLs.
- e. MRLs evolution.
- f. Import tolerance.
- g. MRL exemption.
- h. Limit Of Determination (LOD).

Full Product Information module columns added:

- a. Crop info original names (site orig name).
- b. Application description original names.
- c. Time of application.
- d. Crop stage scale.
- e. Pest complex.
- f. Max. num. treatments per application.
- g. Grazing.
- h. Foreign registration code.
- i. Recommended.

- j. Form validation rules changed: more permissive i.e. broader search allowed on just 1 "Registration number" if it has at least 5 characters.

Basic Product Information with Crops module:

- k. Form validation rules changed: more permissive i.e. broader search allowed on just 1 "Registration number" if it has at least 5 characters.
